Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicants' representative, Erika Takeuchi, telephoned the Examiner to inform him that the specification contains a typographical error on page 10, line 25. The OP-1 sequence should be defined as SEQ ID NO:10 instead of SEQ ID NO:7. This typographical error was carried into the claims. However, it is clear from the specification that SEQ ID NO:7 is a nucleotide sequence encoding AKL-6, not an amino acid sequence of OP-1. This typographical error does not affect the patentability of the claims since the novelty of the invention does not lie in the novelty of the amino acid sequence.
